CONSENT TO PARTICIPATE

Project Title	Impact of AI exposure on creativity
Purpose of the Study	You are invited to participate in this research study examining how people generate ideas and complete creative tasks. The purpose of this study is to better understand the cognitive processes involved in creative thinking, including how individuals produce written responses, drawings, and evaluations of ideas.
Procedures	You will complete a single online study session lasting approximately 20 minutes. After providing consent, you will complete a brief questionnaire collecting demographic and background information. You will then complete a series of creative tasks, which may include generating short written responses (such as headlines or metaphors), creating simple drawings based on prompts, and rating a small set of ideas using structured scales. Finally, you will complete a short post-task questionnaire about your experience. Participation is voluntary, and you may skip any question or withdraw at any time without penalty.
Potential Risks and Discomforts	This study involves no more than minimal risk. The procedures consist of routine online activities similar to everyday creative and judgment tasks. Potential risks may include minor fatigue or mild discomfort associated with computer use. As with any online research, there is a minimal risk of loss of confidentiality. This risk will be mitigated through secure data handling and storage procedures.
Potential Benefits	There are no anticipated direct benefits to participants. Participation in this study is not expected to provide psychological, educational, diagnostic, or therapeutic benefits. The primary benefit of this research is the contribution to scientific understanding of human creativity and interaction with AI systems.

Confidentiality	No directly identifying information (such as names or contact details) will be collected by the research team. Participants will be identified only by platform-generated participant IDs and internal study IDs. All research data will be stored on secure, password-protected, and access-controlled University of Maryland systems. Only authorized members of the research team will have access to the data. Study results will be reported only in aggregate or de-identified form. Participant information may be disclosed only if required by law.
Compensation	Participants will receive 4 USD for completing this study. Compensation will be provided through the Prolific platform. To ensure data quality, the study includes one or more attention check questions. Participants who fail the attention check may not be eligible for compensation, consistent with Prolific's policies. Participants may withdraw from the study at any time; however, compensation will only be provided upon successful completion of the study.
Right to Withdraw and Questions	Your participation in this research is completely voluntary. You may choose not to take part at all. If you decide to participate in this research, you may stop participating at any time. If you decide not to participate in this study or if you stop participating at any time, you will not be penalized or lose any benefits to which you otherwise qualify. If you decide to stop taking part in the study, if you have questions, concerns, or complaints, or if you need to report an injury related to the research, please contact the primary investigator and student coordinator: Primary Investigator: Fumeng Yang, fy@umd.edu Brendan Iribe Center, 8125 Paint Branch Drive, College Park, MD, 20742 Student Researchers: Dhanya Krishnan, dhanyak@g.umd.edu Simran Gawri, sgawri@umd.edu
Participant Rights	If you have questions about your rights as a research participant or wish to report a research-related injury, please contact: University of Maryland College Park Institutional Review Board Office 1204 Marie Mount Hall College Park, Maryland, 20742 E-mail: irb@umd.edu

	Telephone: 301-405-0678 For more information regarding participant rights, please visit: https://research.umd.edu/research-resources/research-compliance/institutional-review-board-irb/research-participants This research has been reviewed according to the University of Maryland, College Park IRB procedures for research involving human subjects.	
Statement of Consent	By electronically signing your full name, you indicate: 1. You are at least 18 years of age. 2. You have read this consent form or have had it read to you. 3. Your questions have been answered to your satisfaction. 4. You voluntarily agree to participate in this research study. You may print/download/save a copy of the consent form for your record in the statement of consent. The research team will also email you a signed copy of this consent form.
